Date of examination: **04.05.2020**

Patient's full name: **Sunaina Avasthi**

DOB: **1981**

Sex: **Female**

Date of sampling: **04.05.2020 9:32**

Date of receipt: **04.05.2020 12:25**

BIOCHEMISTRY

Name and abbreviation of the examined parameters	Result of the examination	Reference range (normal)	Unit
ALT	18.10	< 33	u/l
AST	17.80	< 32	u/l

Date of examination: **05.05.2020**

Patient's full name: **Sunaina Avasthi**

DOB: **1981**

Sex: **Female**

Date of sampling: **04.05.2020 9:55**

Date of receipt: **04.05.2020 15:09**

BACTERIOSCOPY

Name and abbreviation of the examined parameters	Result of the examination
Leucocytes	30-40, on mucus >100
Epithelium cells	In significant quantities
Mucus	In small quantities
Microflora	Mixed, mostly bacillary
Microflora (quantity)	Significant
Trichomonas	Not detected
Gardnerella vaginalis (key cells)	Not detected
Fungi	Not detected
Intracellular and extracellular Diplococci	Not detected

CYTOLOGICAL EXAMINATION (PAP test) # 21

04.05.2020

(date of sampling)

Patient's full name: **Sunaina AVASTHI**

Date of birth: **12.02.1981** Age: **39**

Clinical diagnosis: check-up

Menstrual cycle: pregnancy, 15th week

Material tested: exocervix, endocervix

Doctor: **Lyudmyla DOLA**

PAP TEST PROTOCOL

Type of sampling: traditional

Quality: satisfactory

Adequate cellularity, component of endocervix and transformation zone: present

CONCLUSION / RESULT

CHARACTERISTIC OF EPITHELIUM:

NEGATIVE for Intraepithelial Lesion or Malignancy (NILM)

Notes and explanations: Type I - Cytological image within normal

Date of conclusion: **04.05.2020**

Full doctor's name: **T. MAGAS**
